Bevindingen

De NVAO stelt vast dat in het paneladvies deugdelijk en kenbaar is gemotiveerd op welke gronden het panel de kwaliteit van de opleiding positief heeft bevonden.

Advies panel

Samenvatting bevindingen en overwegingen van het panel.

Standard 1. Intended learning outcomes

The master's programme in International Dispute Settlement and Arbitration will enable students to gain in-depth knowledge of the role and function of international dispute settlement in international law, including international commercial law. The programme distinguishes itself from similar national and international master's programmes by focusing on public international law and by also addressing less formal dispute settlement methods,

Pagina 2 van 6 such as negotiation, mediation, conciliation and arbitration, and by using the status of The Hague/Leiden as a dispute resolution hub. The programme aims to combine an academic orientation with a practice-oriented approach. The advanced nature of the programme is evident from its specialist character and its fast pace. Graduates will be able to work as a legal professional in an international environment, or to conduct further independent academic research, for example, as a PhD researcher. The links with both the academic community and the professional field are strong and provide a good basis for this advanced master's programme. The intended learning outcomes meet the standard.

Standard 2. Teaching-learning environment

The programme consists of three core courses and five supplementary courses. Students complete the programme by writing a thesis. The programme is skilfully designed to avoid overlaps in coverage of courses and provides a comprehensive coverage. The programme has both academic and professional perspectives and provides a solid background and level of practical skills that are useful. The panel has made a few suggestions on the sequence and titles of courses, expecting that this will strengthen the programme even more. The advanced and intensive nature of the programme makes it necessary to select highly qualified students for admission. The panel advises including the requirement that applicants must have completed a legal degree including a course on international law. The panel appreciates the possibilities offered to part-time students, in line with the needs of the professional field.

Characteristic of the advanced master's programme is its small-scale teaching with an intensive interaction between students and lecturers and the use of various and diverse teaching methods, including moot-courts. The student group is expected to consist of a maximum of forty students. The teaching staff is relatively small, but highly qualified and experienced. The core team will have access to other staff to implement the programme successfully, both academics and professionals from practice. The infrastructure, the facilities and support structure are extensive. The programme uses its alumni and guest lecturers from relevant organisations to help students build a useful network. The quality of the programme will be monitored by the Quality Assurance System Standing Committee and the Quality Assurance Manager for the Advanced Studies Programmes. Summing up, the panel concludes that the curriculum, staff and programme-specific services and facilities will provide a stimulating teaching-learning environment, enabling incoming students to achieve the intended learning outcomes. The teaching-learning environment meets the standard.

Standard 3. Assessment

The panel has found evidence of an accessible and transparent approach to assessment . The different methods of assessment conform to accepted national and international standards. The panel advises that using identical exam questions over the years be avoided. Students will be given a clear indication of the test at the beginning of a course and receive extensive feedback in exam review sessions after the exam. The panel advises to use the full marking scale when grading exams. The panel appreciates that grading is done anonymously as much as possible, and that for the thesis a system of double grading is in place. Guest supervisors from professional practice are always seconded by a fulltime member of staff.

The Examination Board monitors and guarantees the quality of assessment and is clearly up to its task.

Pagina 3 van 6 Because the Examination Board is organised jointly for all advanced master's programmes, it has built up considerable experience institutionally. The panel is assured that the quality assurance of the assessment system is well organised. The assessment system meets the standard.

Standard 4. Graduation guarantee and financial provisions

Leiden University guarantees that the financial resources available for the programme are sufficient in order for admitted students to complete the programme. It is anticipated that the programme will be able to attract sufficient numbers of quality students required for financial sustainability and market reputation. The panel agrees that the expected intake numbers seem realistic. The graduation guarantee and financial provisions meet the standard.

Given these considerations, the panel advises NVAO to take a positive decision regarding the quality of the proposed programme wo-master Advanced Studies in International Dispute Settlement and Arbitration at Leiden University.

Aanbevelingen

De NVAO onderschrijft de aanbevelingen van het panel.

Pagina 4 van 6 **Besluit**

Ingevolge het bepaalde in artikel 5a.10, derde lid, in verbinding met artikel 5a.11, achtste lid, van de WHW heeft de NVAO het college van bestuur van de Universiteit Leiden te Leiden in de gelegenheid gesteld zijn zienswijze op het voornemen tot besluit d.d. 15 januari 2018 naar voren te brengen. Bij e-mail van 24 januari 2018 heeft mr. A.G.K. Dibbet namens het college van bestuur ingestemd met het voornemen tot besluit.

De NVAO besluit de aanvraag toets nieuwe opleiding postinitiële wo-master Advanced Studies in International Dispute Settlement and Arbitration (60 EC; varianten: deeltijd, volttijd; locatie: Leiden) van de Universiteit Leiden te Leiden als positief te beoordelen.
